

User help guide for using the system

Import Item

- A table containing 12 rows is already imported to the table in the AddItem GUI. If you want to import more data to the table, go to file and open to import more data to the table.

Adding Item

- Enter Item Id
- Enter Item Name
- Enter Item Category
- Select categories
- Select Price Range
- Enter Price
- Rate the item
- Click add button

Searching item by categories

- Select the categories
- Click the search by category button
- If found, information about item will be displayed

Searching item by price

- Enter price
- Click the search by price button
- If found, information about item will be displayed

Deleting Item

- Enter item Id
- Click the Delete button

- If found, the record of respective item id will be deleted
